**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, and 21 drawn to a method of making a composition, classified in class 424, subclass 49.
- II. Claims 18-20, drawn to a composition, classified in class 424, subclass 195.1.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, inventions I and II are distinct since the product as defined in invention II can be made by another and materially different process from invention I.

These inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter. The search required for Group I is not required for Groups II. The claims as presented would impose serious burden on the examiner to conduct meaningful search and examination. Restriction for examination purposes as indicated is thus proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
